

Indoor Convex Detection Mirrors

Indoor Convex Detection Mirrors are designed to prevent intersection accidents in an industrial application.

Convex mirrors can be positioned to reflect a hidden area to a forklift operator. These mirrors can also be directed to allow equipment operators to view co-workers approaching from behind to reduce accidents.

Convex mirrors should be mounted at the end of alternating aisles to reflect the view of the traffic moving from the neighboring aisles.

Small convexes can be used in offices to view hallways or reception areas for visitors or moving pedestrian traffic.

- 20% Brighter Than Glass Mirrors
- Available in Polycarbonate
- Mounting Hardware Included
- Less Distortion
- Economical

New for High Traffic Areas

Indoor Wide View Convex

- Easy to Install
