CAPABILITIES

Silk screen and digital printing, mirroring, laser cutting, vacuum forming, cnc routing, wood and metal fabrication and framing.

PRINTING

All signs are screen or digitally printed. Our state of the art flatbed digital printer can produce vibrant 4 color process images on a variety of substrates including: plastic, glass, wood and many other rigid surfaces

MIRRORING

Because our images are applied to the second surface (reverse side), the imprint is scratch proof and distortion free. Many first surface (front) printed mirrors have visual quality issues. After mirroring, a protective backer board is provided which offers rigidity and safety.

CREATIVE

In-house design and photography services available. We can provide original art or convert your design or logo into professionally finished signage.

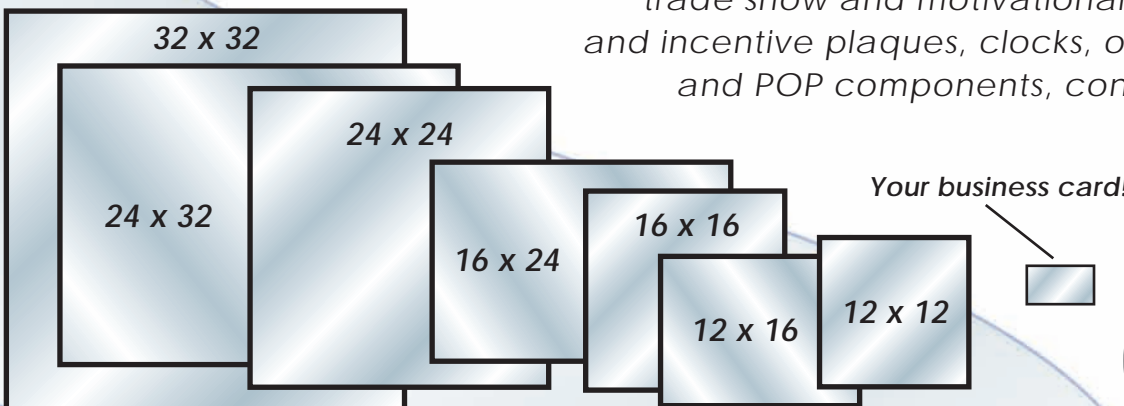

SERVICES

We offer individual and master pack cartons and can bulk pack in crates for domestic or international destinations. We offer warehousing and fulfillment programs as well.

PRICING

Our creative staff can design a sign to fit your budget requirements. Let us best cost fit your design as it relates to size, printing process, shape, frame (if needed), packaging, assembly and shipping.

IDEA STARTER: *Wall Mirrors, growth chart mirrors, locker mirrors, menu chalk & dry erase boards, display enhancers, trade show and motivational give aways, award and incentive plaques, clocks, on premise danglers and POP components, convex/domed mirrors and ...much more!*
